Outside enclosures

Dog kennels with run

Price varies to the size you order. Some can cost only a little bit more than what some hutches or runs on their own would cost!

Spacious runs with the hutch enclosed

Don't take up as much of your garden as you may first think they do.

Sheds with runs attached

This is a very popular & secure way to keep rabbits. Sheds are very reasonably priced. You could also use a wooden playhouse or wooden bike shed in the same way

Aviaries or walk in runs with hutches inside

Aviaries with a hutch enclosed are great. Nice & open & airy. Also very easy to clean out as you can get in & out easily. Will need roofing and added protection in the winter

Always make sure your enclosures are predator proof by placing on slabs and attaching good secure locks & using strong galvanised wire

Sheds with aviaries attached

Similar idea to having the run attached to the shed, but this is easier to access and clean out.
